## SERVICES

### Free Estimates

We provide free phone and on-site estimates. Typically, a local move can be assessed by phone; however, if there are over-sized items or complicated circumstances, we are pleased to visit the site and help our customer assess the estimate.

### Local Moving

Local moves are under 50 miles. Local moves are quoted an hourly rate with varying number of movers. Hourly rates are higher with each additional mover; however, the time is often significantly decreased, lowering the hourly rate and overall cost.

### Long Distance Moving

Long distance moves are over 50 miles, within the continental United States. The load is dedicated to the individual customer, and not combined with other loads. Loading and unloading services included. Long distance moves are quoted by an on-site specialist.

### Labor Only

Our labor only services are the solution for load swaps, loading and unloading a rented truck, pod or other type of portable storage container and packing. Labor only is quoted an hourly rate with varying number of movers. Hourly rates are higher with each additional mover; however, the time is often significantly decreased, lowering the hourly rate and overall cost.

### Oversized Items

Over-sized items include anything over 150 lbs. Special equipment is often required to move over-sized items to ensure safety of the crew and the items. Over-sized items often include: pianos (baby grand and upright), pool tables, gun safes, and sometimes very large custom pieces of furniture.

### Business Relocation

Our full-service or à la carte business relocation specialist can disassemble and reassemble nearly any office configuration—working after hours, weekends or holidays to minimize the down time of your operation.

### Storage Solutions

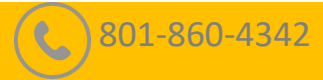

We offer warehouse, individualized storage solutions and temperature controlled storage solutions. We also partner with many accredited storage facilities across the Wasatch Front to extend discounts for customers seeking 24/7 access to their belongings.

## ABOUT US

You can find small, local moving companies everywhere. You can also find horror stories about moving experiences everywhere, too.

To avoid becoming a victim of a moving tragedy, it's important to know about the moving company's history, credentials, past customer experiences, how they've addressed complaints, as well as their pricing.

In the State of Utah, moving companies are required to have a current USDOT number.

### At Smart Move:

- Formal, professional training and testing for each employee, no on the job training.
- \$2mm in liability insurance and \$20k basic protection for each load.. Additional coverage available, as needed.
- Worker's compensation insurance for each employee (important because without it, they could sue your home owner's policy, if they get hurt on your property)
- All modern moving equipment and tools to ensure safe and effective moves.
- Each employee is drug tested and has had a background check performed.
- Employees are uniformed and must present an identification badge on site.
- Specialized moving trucks with lift gates, ramps and side entry box doors.
- Better Business Bureau certified.
- Over-sized object moving training and specialized equipment.
- Long history of customer reviews on third-party sites: Yelp, Dex, Angie's List, etc.

## DON'T JUST TAKE OUR WORD FOR IT

Smart Move has been in business since 2007. Since that time, we have been reviewed by hundreds of our customers on third-party consumer sites; such as, YELP!, Dex, Angie's List, Google+, Better Business Bureau, Hire a Helper, and many more. We highly encourage anyone thinking about hiring a moving company to review our past customer's ratings—4.5 to 5 star ratings, consistently.

Any moving company who tells you they never have an accident is lying. It's what they do when something occurs that really matters most. At Smart Move, we are dedicated to 100% customer satisfaction—we will always do everything we can to make it right.
